Multi-Stakeholder Ransomware SIG

(TLP WHITE)
https://www.first.org/global/sigs/msr/

Version: 1.0 - 5 minutes

SIG Steering committee/Co-chairs:

Barry Greene
Eireann Leverett
James Chappell

About Multi-Stakeholder Ransomware SIG

It "Takes a Village"

- **Ransomware is not addressable by a single group of people.**

- **At a minimum:**
  - **Law Enforcement, Insurers, Policy Makers, Governments AND**
  - **National CERTs, Product SIRTs, CSIRTS (FIRST)**

So…

We created A SIG to foster collective action

3 GOALS

Measure
Collect real Data and Metrics on Ransomware. To give up to date insight into it's behaviour and evolution. Turn this into a tangible published output.

Resources
Collect, Reference and Publish Resources & Best Practices, Guides, Materials, Intelligence that can support incident responders and the FIRST Community to respond
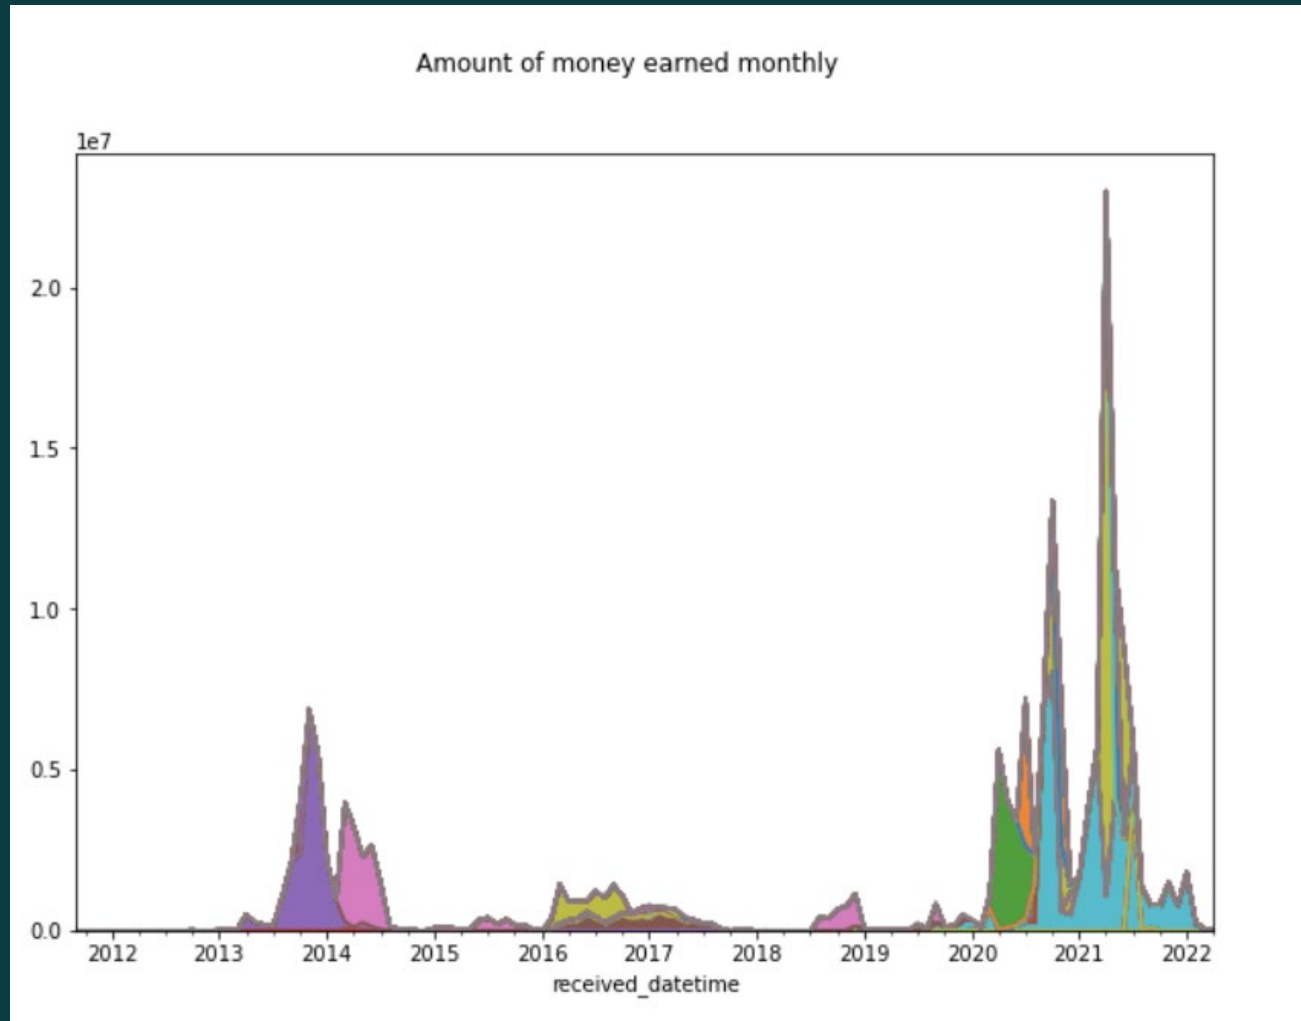

Listen
To Stakeholders from multiple disciplines and backgrounds. Record the perspectives - help inform policy projects

Objective: Support Ransomware Response, mitigation, remediation, investigation, and prevention.

Customer : The FIRST Community

Ransomware - Data Service (portal.first.org)

Amount of money earned monthly

So Far, So Good…..

Key Principle: Don't reinvent the wheel.

SIG Meetings

- News of the week, Intel examples, latest group behaviours
- Invited Speakers / Participants - presentations
- Data project updates
- Community growth objectives

FIRST Slack Community

FIRST Best practice Guide proposals

Proposals for policy guidelines

Where next?

- Mature the data analysis project to include other contributing parties
- We want to **collect more** to **better define the problem** and to **support evidence of the actions that may be most effective.**
- The group is thinking about what **broad systemic disruptive actions** may help the reduction of harm

Founding objective - Write and produce deliverables that would support policy makers and other stakeholders to take effective action.

^^ We need help with this.
