Hiring

71% of women thought tech was 'too complex' a career - Microsoft

27% of women believed men were a better fit for a tech career – Microsoft

Women represent around 17% of the digital workforce- The Guardian

A woman with long dark hair and glasses is holding a large brown cardboard sign. She is wearing a black and white striped shirt. The background is a dark, textured wall.

Retaining

'Processes, such as developing an inclusive culture, implementing zero-tolerance policies on harassment and discrimination, and providing access to mentors and advocates play a role in retention, as well. But by first focusing on eliminating pay and advancement inequalities, you can take a giant leap forward on the retention front.'

Clar Rosso, ISC2

Developing

If you could wave a magic wand
and better empower females in
IR/CI, what would you do?

#FIRSTCON23

Thank you!
